However, even though we cannot provide support for Windows XP, we continue to innovate for the future of PC experiences. We are committed to your PC as long as you're using a Windows 7 or higher product. When you have a fresh install of Windows 10, you'll be prompted to choose a time zone. This option helps your PC clock keep the correct time in your region. Note that the Windows 10 Impersonation Service isn't available for this initial operating system release. When you use a different PC or device to sign in to Windows, that PC or device will be treated as a trusted device and will be able to sign in using a Microsoft account. In this release, we've expanded Windows 10 into its first phase of development. This allows us to collect feedback directly from our Windows Insiders on the new features. In addition, in this phase, we are gathering feedback from the Windows community in order to provide a great experience for Windows 10 and Windows 10 Mobile users. In November 2015, we released an updated version of the Windows 10 Technical Preview. Windows XP Professional Edition is a good entry-level version of the operating system, and it can run all Microsoft applications and software and is supported with security and maintenance updates through April 2015. Windows XP Sp3 is supported until April 2014, so it will be available for some time, and you can get support and security updates for it through that period of time. Microsoft does not recommend that people upgrade from XP to Windows 7 or Windows 8 or Windows 10 for enterprise computing. Download Windows XP Professional Edition if you are just getting started with Windows XP. 5ec8ef588b
